Description of section handed over Job specification. description

Stage

Jobsheet. description

Scaffolding as described above has now been completed and complies with the Construction Health, Safety and work at height 2005 regulation. It is structurally sound and should be used and loaded in accordance with our Quotation no. enquiry. enquiryid/enquiry. enquirynumber Item(s) no. job specification. itemnumber

Use only for Job specification. purpose Loading to be job specification. Working lifts no. working lift(s) with distributed load of job specification. loading kN/m2 per lift job specification. Platform description

The detailed requirements of the Regulations with regard to guardrails, working platforms, toeboards, bracing and ties have been complied with.

This scaffold must be inspected before being taken into use for the first time; after any event likely to have affected its strength or stability; and at regular intervals not exceeding 7 days since the last inspection.

All employers and people in control of construction work should ensure inspections are carried out by a competent person and recorded in accordance with Regulations 29 and 30 of the CHSW Regs 1996.

NB Tarpaulin sheets, advertising signs (or other windsails) must not be fixed to a scaffold unless it has been specifically designed to take them.

DO NOT REMOVE TIES

RISK ASSESSMENT

CLIENT	:	Contractor.customername
PROJECT	:	Site.sitename
DATE	:	
SUMMARY OF RISK TO BE	:	Specifically, the delivery, erection, adaptation and dismantling of
ASSESSED		scaffolding.

PERSONS AT RISK

- scaffolders •
- other operatives working on or below the working platform
 other trades working on site
 Occupiers and members of the public

1.	Hazard: Manual handling	
	Risk	Risk control
	Injuries and strains caused by unnecessary manual	Appropriate PPE (e.g. hard hat, boots, gloves) to be worn at all times; training in lifting
	handling or poor manual handling technique	techniques; use of gin wheels, hoists or other lifting devices where appropriate
2.	Hazard: Falls of people	
	Risk	Risk control
	Major injuries through falls of persons as a result of	Scaffolders to be registered on CITB Scaffolders' Record Scheme.
	incorrectly constructed structures; inadequate edge or	All materials to be inspected before use, and any defective materials discarded and
	opening protection and access (unsafe ladders); poor	returned to depot for scrapping or repair.
	housekeeping standards creating risks of tripping	All scaffolding erected, adapted and dismantled only by our trained operatives.
		The wearing of safety harness to be in strict accordance with NASC/HSE Risk Assessment
		and Risk Control Guidance on the Provision and Use of Safety Harnesses (1999). (See
		Company Safety File.)
		'Chaining' of materials to be carried out on completed platforms only, i.e. correctly spaced
		handrails and toe boards to be fitted. Alternatively, harnesses to be worn and attached for
		this operation. Scaffold to be constructed on a minimum 3-board wide platform, 4-board
		wide where materials are being stacked.

Risk Assessment

		Trades using the work platforms have a duty of care to check there have been no
		unauthorised alterations carried out after our handing over, for example:
		(a) Ensure no handrails have been removed
		(b) Ensure toe boards are still in place
		(c) Ensure all brick guards are still in place
		(d) Ensure that boards have not been removed from the working platform
		(e) Ensure that ladders are correctly tied, the correct length and angle
3.	Hazard: Falling materials - scaffolding and other	
0.	Risk	Risk control
	Head and other injuries through falling materials	Where possible area to be cordoned off during the erection/dismantling process. Warning
		signs to be displayed. Scaffolding materials to be neatly stacked and secured when not
		being used. Raising and lowering of materials by controlled means only
4.	Hazard: Asbestos or other contaminants	
ч.	Risk	Risk control
	Injuries from contact with hazardous substances produced	COSHH assessment: questioning the client and/or the site manager to ascertain the level of
	by actions of others on site	any risk.
5.	Hazard: Overhead power lines
